## CRITTER OF THE WEEK!

**Fisher's Seahorse– Grows to 3”;** thought to be pelagic, this species attached itself to floating objects; can be found in the summer months in shallow water after storms but only a trained eye can find them; extremely delicate and will not usually survive in captivity . We have photographed them in Kaanapali and Makena in shallow water in the Fall months. Seahorses are rare in Hawaii.

**DATE OF REPORTING: SEPTEMBER 27, 2011**  
**AIR TEMPERATURE: 87 degrees**  
**WATER TEMPERATURE: 79 degrees**  
**VIZIBILITY: 90' +**
